

Dr Hilda Pickett

Children's Medical Research Institute

Funded by Can Too

Unlocking cancer cells' secrets by studying telomeres (the protective structures at the ends of chromosomes)

Dr Fares Al-Ejeh

Queensland Institute of Medical Research (QIMR) Brisbane

Funded by Can Too

Cancer treatment through "Target Creation Strategy". Combining chemotherapy with the tumour-targeted delivery of internal radiotherapy

Dr Gough Au

University of Newcastle

Funded by Can Too

Using viruses to kill cancer cells

Dr Daniel Andrews

Peter MacCallum Cancer Centre

Funded by Can Too

Lymphocyte receptors that regulate tumor development and therapy

Dr Kerrilyn Diener

Hanson Institute

Funded by Can Too

Development of microfluidic chips to isolate peripheral blood cell populations in pancreatic cancer

Dr Christine Napier

Children's Medical Research Institute

Funded by Can Too

Seeking to stop unlimited cell proliferation

Dr Patsy Soon

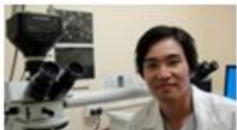

Kolling Institute of Medical Research

Funded by Can Too

Stopping breast cancer in its tracks

Dr Shusuke Toden

CSIRO Human Nutrition

Funded by Can Too

Can Fish Oil protect against bowel cancer?

Dr Guy Tsafnat

University of New South Wales

Funded by Can Too

Finding out why breakdowns in genes happen and why genes switch off

Dr Nicole Haynes

Peter MacCallum Cancer Centre

Funded by Can Too

Engineering antibodies to kill cancer
